Email: francesco.daloe@gmail.com
Mobile: 07752 251 710
Eligible to work: EU citizen – Italian

Portfolio: francescodaloe.com

Profile

I am an enthusiastic and highly competent Front End Developer, with a natural intellectual curiosity and a strong interest in continuously learning new skills.

My passion and drive to build a career as a developer led me to further my knowledge by completing a Foundation Degree in Web Development, alongside working in my full-time role as a coder in my current employment. My next goal is to learn React and could work with it.

I like to work in a team and help others when I can. I have an excellent attention to detail and a good problem solving ability.

Before moving to London and 'coming into the Tech world', I worked as a planner and seller in a home furniture shop in Italy for five years.

My interests include reading, writing, photography and travel, which I love to combine when I can. I have written two books, which I am currently translating into English.
